

Myriad Foresight® Carrier Screen

CLINICIAN GUIDE FOR GENETIC TESTING

Access Myriad testing for Australian patients

Genomic Diagnostics and the Healius Pathology network are the Australian partners for Myriad Women's Health, a leader worldwide in carrier screen testing. We can enable your patients simple access to the Myriad Foresight Carrier Screen, an expanded carrier screen for more than 175+ serious and actionable genetic diseases through our network of collection centres.

Detect more with expanded carrier screening

Carrier screening is used to identify couples who are at risk of passing inherited disorders to their children. Traditionally, carrier screening has been offered to patients based on their ethnic background or family history, however, this approach can miss couples at risk of having a pregnancy affected by a genetic disease.

Expanded carrier screening (ECS) panels can be used to detect a wider range of at risk couples compared to traditional simple carrier screens that often include only cystic fibrosis (CF), spinal muscular atrophy (SMA) and fragile X syndrome (FXS).

Key benefits of Myriad Foresight® Carrier Screen

Most parents are not aware they are at risk.

80% of children born with genetic disease have no family history of the condition¹

Affected couple rates are high

ECS

1 in 300 pregnancies

Approximately 1 in 300 pregnancies are affected by a condition screened by the Myriad Foresight Carrier Screen (ECS)²

Genetic Counselling is included in the service

- Pre-test genetic counselling is available for all prospective patients.
- Post-test genetic counselling for all carriers is included free of charge.
- Patients call 1300 268 6795 (1300Counsyl) for genetic counselling*.

Myriad Foresight® has unmatched detection of serious disorders

The Myriad Foresight Carrier Screen detection rates

>99% for most genes

The overwhelming majority of genes on the panel have detection rates >99%, which ensures utmost confidence in both positive and negative results.

1 in 22 couples at-risk

Leads the industry in helping providers identify at-risk-couples for serious and actionable conditions.²

The true goal of carrier screening is to detect at-risk couples of serious diseases. The Myriad Foresight Carrier Screen has been designed to maximise detection rates for the diseases that matter the most.

How to Order

- This test is not covered by private health insurance or Medicare.
- Pre-payment is required before collection. Payment can be made via our website at genomicdiagnostics.com.au or by calling our Customer Care team on 1800 822 999.
- This test has a dedicated request form which can be requested from Customer Care or downloaded from our website at genomicdiagnostics.com.au

Step 1

Consider genetic testing

Discuss with your patient as recommended by clinical guidelines.

Step 2

Request test

Order test using a Myriad Foresight test request form. This can be downloaded from the Genomic Diagnostics website.

Step 3

Patient pays for the test

Visit the Genomic Diagnostics website to pay or call 1800 822 999. Record the receipt number on the request form.

Step 4

Patient attends collection centre

The patient(s) attend a Healius Pathology network collection centre where the sample is collected and sent to us.

Step 5

Results returned

The results will be returned to you by fax. Please ensure to include your fax details on the request form.
