Genomic Diagnostics

Genetic Carrier Screening for informed decisions

Genetic carrier screening tests for the three most common severe genetic conditions.

One in 20 Australians will be a carrier for at least one of these conditions and most will not have a family history of the disease.¹

RANZCOG recommends offering carrier screening to all women considering pregnancy or in their first trimester of pregnancy.²

Your reliable partner for genetic screening

- Fast, accurate results within 10 working days
- Convenience for your patients, with over 650 Lavery Pathology collection centres
- Free genetic counselling for all carrier couples
- Dedicated support from our Genomic Diagnostics experts and customer care team

Now funded by Medicare*

Genetic carrier screening for cystic fibrosis, fragile X syndrome and spinal muscular atrophy is now listed on the Medicare Benefits Schedule.

Medicare criteria

- Patient who is pregnant or planning pregnancy (Item 73451)
- Reproductive partner of a carrier (Item 73452)
